

FM Conway secures new 6-year Term Maintenance contract with Southwark Council

Leading infrastructure services company FM Conway has been awarded the Term Maintenance contract for the London Borough of Southwark. The contract value estimated in excess of £70 million, is for delivery of both planned and reactive works until 2026 with an option to extend to 2028.

The new contract is due to commence on the 1st July 2020 amid Brexit and the COVID-19 outbreak, two situations that are likely to present their own unique challenges in the planning and delivery. The contract has demanding targets including demonstrating added social value, extensive carbon emission monitoring, and the development of enhanced technological delivery. Added social value was a significant element of the tender, ensuring residents and business benefitted directly and indirectly from the Council's spending, an integral part of both Southwark and FM Conway's core values. Having worked collaboratively with Southwark Council for 15 years, the FM Conway team look forward to the continued partnership.

The planned works for the years ahead includes but are not limited to, major regeneration projects in Canada Water, Elephant and Castle and Old Kent Road. Southwark is in one of the most diverse of the London Boroughs, and will no doubt present many different opportunities. FM Conway will strive to assist Southwark Council to help businesses and communities to thrive, promote local skills and employment, and continue to deliver an award-winning standard of service.

James Tallon, Term Maintenance Director at FM Conway comments: *"We are delighted to continue our long-term partnership with Southwark Council. Over the past 15 of years we have built up a detailed understanding of the area, the residents, the visitors and the local character of the borough and we look forward to an exciting future building on our past successes and driving new innovations and sustainable solutions to the benefit of everyone in Southwark."*

Southwark Cllr Richard Livingstone said: *"We look forward to working with FM Conway as we move forward with our plans to make our roads safer, promote more sustainable travel and tackle the Climate Emergency in Southwark."*

About FM Conway

FM Conway is a leading infrastructure services company delivering vital services in transportation, the built environment and open spaces for communities and businesses.

We inspect, design, build, enhance and maintain essential infrastructure services for the community.

With more than 57 years' experience, we pride ourselves on being an industry leader and innovator, especially in recycling and reuse. We have a network of asphalt and aggregate recycling manufacturing plants serving London and the south of England, as well as a Thames side wharf and our own research and development laboratory. We have the ability to produce asphalt with a high recycled content and low carbon footprint. We are a member of the British Safety Council, the Civil Engineering Contractors' Association, the British Association of Landscape Industries and the Quarry Products Association, as well as being BSI registered for environmental and quality management.
