

FM Conway and Shell partner on decarbonisation strategy to achieve net zero

Leading infrastructure services company FM Conway has signed a memorandum of understanding with Shell that will see both parties develop a collaborative decarbonisation strategy towards achieving net zero emissions.

The agreement ensures that both parties will work together to achieve FM Conway's transition to carbon net zero and will focus on the following areas of business:

- Energy management
- Transport
- Plant and tools
- Sustainable bitumen and asphalt technology
- Carbon offsets
- Training and development

The joint strategy will explore options such as renewable energy solutions, and next generation fuels, as well as exploring a collaborative approach for both FM Conway and Shell's electric vehicle (EV) charging solutions, SureCharge and Shell Recharge respectively.

FM Conway's Net Zero Strategy, launched in November 2021, sets out its roadmap for becoming a net zero carbon business by 2045 and marks a commitment to combatting the growing climate change agenda.

Now FM Conway's new partnership will aim to further build upon this by utilising Shell's knowledge and expertise to accelerate the decarbonisation process.

PRESS RELEASE

February 2023

Joanne Conway, FM Conway Group Chair, said:

“As a pioneer of sustainable construction activities, FM Conway recognises the importance of achieving net zero for both our business and the wider industry so that we can ultimately protect our planet’s resources.

“A key element of our Net Zero Strategy focuses on collaborating with our clients and partners to share best practice and I am delighted that this agreement with Shell means that we can take the next step towards a net zero future.”

Ana Alvernhe, General Manager, Shell Construction & Road, said:

“We’re delighted to partner with FM Conway and support them in their net zero journey. This collaboration is critical to the sector, which is amongst the hardest to decarbonise, and we’re committed to working together to identify the low and zero-carbon solutions available right now to make a difference, and in the longer-term deliver offers that are in development.”

About FM Conway

FM Conway is a leading infrastructure services company. Operating in transportation, the built environment, and public realm, we self-deliver all of our services, providing in-house capabilities across the entire lifecycle of a project.

We inspect, design, build, enhance and maintain essential infrastructure services for the community.

With over 60 years’ experience, we pride ourselves on being an industry leader and innovator, especially in recycling and reuse. We have a network of asphalt and aggregate recycling manufacturing plants serving London and the wider regions throughout the UK, as well as a Thames-side wharf and our own research and development laboratory.

We recycle 100-percent of highway arisings, including kerbs, paving and concrete and we have the ability to produce asphalt with a high recycled content and a low carbon footprint.

We are a member of the British Safety Council, the Civil Engineering Contractors’ Association, and the Quarry Products Association, as well as being BSI registered for environmental and quality management.

We are multi-award winning in our approach to road safety and were the first company in the UK to have achieved British Standard ISO 39001, which provides a framework to help organisations reduce the incidence and adverse effects of road traffic accidents.
